

Global Chat App

A simple real-time global chat application built with Node.js, Express.js, and Socket.io.

Features

- Real-time messaging between all connected users
- Simple web interface
- Expandable with usernames, message history, and more

Getting Started

1. Install Node.js

Download and install from nodejs.org.

2. Clone this repository

```
git clone <your-repo-url>
cd HokeyServer
```

3. Install dependencies

```
npm install
```

4. Run the server

```
node index.js
```

5. Open your browser

Go to <http://localhost:3000>

Learning Roadmap

See [ROADMAP.pdf](#) for a step-by-step learning guide of this app.
